## Things To Do

Make boards

☒ 0/1

Make a function to self generate boards

make a sudoku solving algorithm

Lock starting numbers so user cant accidentally change them

## Doing

add gems

make board prettier

colour starting numbers different to numbers entered by user

## Done

Make boards accept user input

Make multiple boards

Make answer boards link to main sudoku boards

Make error handling loop when player inputs wrong info

Create user flow chart

Make testing documentation

make a "win" condition

test board

upload to github

minimise DRY breaches

Increase code readability

make a help function
